Stated dimensions are measured consistent with the definition of the "Unit" set forth in the Declaration (which generally only includes the interior airspace between the perimeter walls and excludes interior structural components.) Measurements of rooms set forth on any floor plan are generally taken at the greatest points of each given room (as if the room were a perfect rectangle), without regard for any cutouts. Accordingly the area of the actual room will typically be smaller than the product obtained by multiplying the stated length times width. ALL dimensions are approximate, and all floor plans and development plans are subject to change.
